Microsoft Word 2003

The most frequent help desk requests come from users looking to do every day things. This demo takes users through a course that will teach them to format a Word document. It includes a real time simulation that gives the user immediate feedback to their interactions.

Microsoft Publisher 2003

This course takes users through the process of creating and modifying professional-looking, high quality publications for print media, e-mail, and Web. Users also learn how to prepare their publications for desktop and commercial printing.

Microsoft PowerPoint 2003

Users learn how to create and modify a presentation, enhance a presentation with pictures and charts, and customize a presentation with slide masters. This course also teaches how to add and rehearse slide show timings and how to run a slide show.
